

Conservation Genetics in the Tropics

Miguel Camacho Sánchez

PhD in Evolutionary Biology October 19th, 2021

miguelcamachosanchez@gmail.com miguelcamachosanchez.weebly.com

Conservation Genetics in the Tropics

- October 19th
 - Assembly and alignment of mitochondrial genomes.
- October 25th
 - Reconstruction of phylogenies.

PhD Evolutionary Biology

Doñana Biological Station-Univ Pablo de Olavide, 2017 **Evolution of mammals in Sundaland**

Postdoctoral researcher CiBIO

Porto, Portugal, 2019

Conservation genetics of amphibians in Iberia

Postdoctoral researcher IFAPA

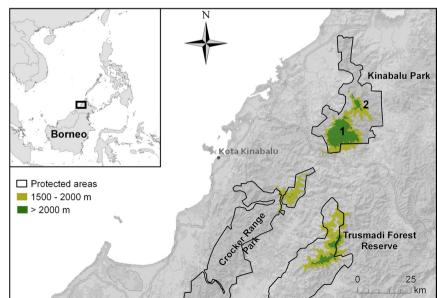

Seville, Spain, 2021-?

Metabarcoding of bacteria and fungi for applied agriculture

Research interests

Preparing traps in Mirad Irad Camp, Trusmadi

Tomahawk trap

Mountain scrubland at 2500 m in Mt. Tambuyukon

Views from summit trapping locations in Trusmadi

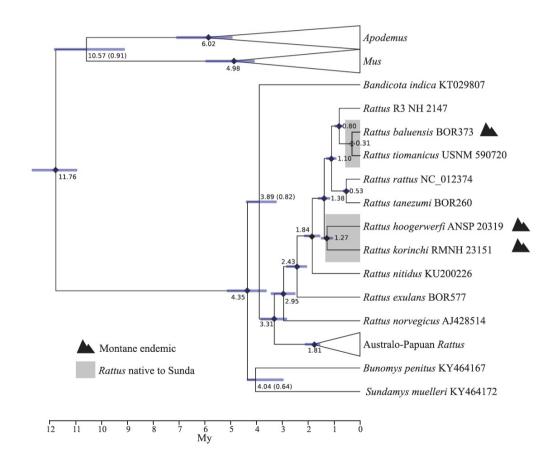

Clouds covering the camp at 2000 m in Mt. Tambuyukon

Mossy forest at 2000 m in Mt. Tambuyukon

Using genetics: evolutionary questions

Data analysis for answering questions in conservation and evolutionary biology
